

UFP-20

Portable Ultrasonic Flowmeter

FEATURES

- This product adopts an automatic operation method using sample water pressure which is matched to the operation of an oil separator or pump.
- The automatic washing function of the detection unit can reduce troublesome manual washing work.
- An error code indication provided at occurrence of a device fault and a stain indication of the detection unit facilitate maintenance and inspection. The product has a high-maintainability structure.
- Operation records such as trouble alarms can be saved in a memory card and confirmed as required.
- For alarms, a double safety method is used. When the oil concentration is 15 ppm or more, and When sample water is defective or the instrument is defective, a alarm is output.
- Replacement of detecting part (sensor) separately sold can be accepted. as the completion of every five years calibration.
