

# Membrane BioReactor Sewage Treatment Plants (MBR)

detegasa

- **Best option for Navy and Offshore projects**
- **Excellent effluent quality**
- **Fully customizable**

- **Membrane-type plants: physical barrier to solids & particulate matter**
- **IMO MEPC 159(55) & MEPC 227(64) MED Type Approved**
- **MBR Series: for high crews from 100 to 1000 people**
- **Mitsubishi Rayon membranes**
- **Best option for Marine and Offshore projects**

**detegasa**

## **Membrane BioReactor Sewage Treatment Plants (MBR)**

Biological sewage treatment based on membrane technology. A compact and reliable alternative of Sewage Treatment Plant for high crew or high-quality effluent requirements, especially for offshore and Navy projects.

- **Latest state of the art technology in water filtration**
- **Reduced footprint**
- **Excellent effluent quality**
- **Optimal solution for large crew vessels**
- **Environmentally friendly technology (no chemicals required for disinfection)**
- **Fully customizable**
